

NATTHAWAT NARIN

Senior Software Engineer | Full-Stack Developer | Backend Developer

+66 95-291-4822 LINE: na10tthawat tah.nthw@gmail.com tah-natthawat nthw.dev

PROFESSIONAL SUMMARY

Software Engineer with **5+ years** of full-stack experience since **2020**, specializing in **FinTech**, **banking**, and **crypto**. Expertise in **backend development and system design**, with hands-on experience across mobile applications, websites, DevOps, server management, and CI/CD pipelines. Quick to adopt new technologies and continuously improve **development processes**, with a strong appetite for **challenging** work.

PROFESSIONAL EXPERIENCE

Senior Backend Developer

01/2025 - Present

Arise by Infinitas Co., Ltd. (Outsource via GetLinks → N7 Labs) Bangkok, Thailand

Projects: digital lending platforms for a **leading Thai commercial bank** and a **new virtual bank**

- Build **30+** RESTful API endpoints in **Go** (Gin, Bun, PostgreSQL, AWS S3, Redis, gotenberg) for bill generation, reminder, and repayment flows
- Build **14+** **Kafka** consumers to process billing and repayment events asynchronously
- Build **4** **Airflow** DAGs to schedule recurring bill reminder jobs, with **AWS S3** for document storage
- Write unit and integration tests, maintaining test coverage above **80%**
- Build regulatory reporting pipelines as **10 AWS Glue** jobs in **Python** using **Spark SQL**
- Load-test APIs and **Kafka** consumers with **k6** against WireMock-stubbed dependencies, profiling TPS, CPU, memory, and database behavior to remove bottlenecks and support **20k–100k** users

Senior Full-Stack Developer

02/2024 - 12/2024

AATECH SOLUTION CO., LTD. (Freelance) Remote (100%)

Sole developer from backend, web, and mobile through deployment

- **TX-Service Laos** — payment gateway for the Lao market with QR deposits and bank withdrawals across **35+** RESTful endpoints in **Go** (Gin, PostgreSQL, Redis), with **RFC 9421 (Ed25519)** webhook verification, **SQS FIFO** event processing, and a **Next.js** admin dashboard
- **Smart Hire AI** — hiring platform where candidates answer interview questions and the **ChatGPT API** analyzes their responses, built in **Next.js** and **Tailwind CSS**, running all server-side logic in the app itself rather than a separate API service, for faster development
- **North HR** — an employee management system built as a **Flutter** mobile app, a **Next.js** back-office (**Tailwind CSS**), and a **NestJS API** (**Prisma**, **PostgreSQL**) exposing **50+** RESTful API endpoints: location-based check-in/check-out via the **Google Maps API**, push notifications through **Firebase Cloud Messaging**, and file storage on **AWS S3** with e-signed documents viewable by link
- **GiftMe** — donation platform for streamers, with SCB bank QR code payment integration, built in **Next.js** with a **NestJS** backend exposing **40+** RESTful endpoints
- Deployed all four with **Docker** behind **Nginx Proxy Manager**, delivered by **GitHub Actions** to **AWS**, **DigitalOcean**, or **Firebase App Distribution** for mobile deployment

Full-Stack Developer

05/2022 - 10/2023

Xspring Digital Co., Ltd. (Full-time) Bangkok, Thailand

Project: **Xspring Digital**, a crypto trading and ICO portal (**iOS** / **Android**)

- Migrated the system from a monolithic to a microservices architecture, building RESTful services in **Node.js** (**Fastify**) and **Go** (**Fiber**) with **Redis** caching and **RabbitMQ** for ledger balance updates
- Built the trade, KYC, notification, and back-office UIs in **Nuxt.js** (**Sass**) and **Flutter**
- Integrated external providers — **AppMan** and **NDID** for KYC, **Coinbase** for trading, and **Fireblocks** for the cold wallet dashboard
- Built a public trading API documented with **OpenAPI** for programmatic access
- Wrote **Kubernetes** manifests (Deployment, Service, ConfigMap) to deploy each new service
- Mentored junior developers, improving code quality and maintainability

Full-Stack Developer

08/2021 - 04/2022

Blockfint Co., Ltd. (Full-time) Bangkok, Thailand

Project: Thinker Loan, home, and personal loan platform for a **Thai commercial bank**

- Built RESTful microservices in **Go net/http**, exposed through **GraphQL** with **gRPC**
- Built a real-time chat system in the **Next.js** web app over **WebSocket**
- See full experience history on [LinkedIn](#)

TECHNICAL SKILLS

Programming Languages

TypeScript, Go, Dart, Python, Kotlin

Frontend Frameworks

React, Next.js, Vue.js, Nuxt.js, Tailwind CSS

Mobile Frameworks

Flutter

Backend & API

Go (Gin, Fiber), Node.js (Fastify, NestJS), Python (Django), Kotlin (Spring Boot)

Testing Tools

Go (Testify, Mockery, Ginkgo, Gomega), TypeScript (Jest, Playwright)

Databases

PostgreSQL, MySQL, MongoDB, Redis

Message Queues

Kafka, RabbitMQ, AWS SQS

DevOps & Cloud

Docker, Kubernetes, AWS, Firebase, GitHub Actions, GitLab CI/CD, Cloudflare

EDUCATION

B.Eng. in Computer Engineering
Suranaree University of Technology
2017 - 2021

LANGUAGES

Thai | English
